

AREAS OF COVERAGE IN THE U.S.

The States encircled with green, are in our area of coverage. In addition, we are also expanding our area of coverage to Tennessee - with additional interest in others areas of the U.S., we plan on opening those areas as well

For those States out of our area of coverage, we have developed a measuring kit and a 17 page manual, which will give you an easy-to-follow procedure to make the correct measurements and pictures required for us to build you a 'custom made' dressage saddle for you and your horse.

A Fitting Kit and detailed manual are yours to keep for future readjustments, as your horse makes positive muscular/skeletal changes – those readjustments are free.

If you need help with making those measurements, we can help your local saddle-fitter with that procedure. We will also provide them with the best tree-machine in the world, plus give them the instructions to become the best saddle-fitter in your area.

Contact Carol at equineinspiredinfo@gmail.com, or call 855 469-4677 for a video link that will give you an overview of this ordering procedure.
