

We have received frequent requests for our line of products, by dressage and the Jumping discipline riders from the countries represented by the flags to the left.

It was for that reason, that we have designed a thorough fitting procedure that will insure that we can design and build a dressage saddle that will address the requirements for you to ride in a relaxed shoulder-hip-heel position, and allow your horse to move without resistance from saddle and rider.

A Fitting Kit and detailed, easy to follow 17 page manual, is a combination questioner and instructions on how to make the necessary measurements and photos to insure we can make your saddle fit perfectly. The kit is yours to keep for future readjustments.

Perhaps our biggest concern was, how we can extend the service agreement we offer all of our clients, which is to make adjustments to your saddle when your horse makes positive muscular/skeletal changes. So included with the sale of this saddle, is a service agreement that we will offer free adjustments to your saddle excluding the shipping charges - notify us for an economical logistics solution.

Another issue is the 'customs and duties' charges that are added to the price of the saddle, which we found to be surprisingly less than what was rumored. When a saddle is shipped back to us for readjustments, additional custom and duty fees do not apply.

Contact Carol at [equineinspiredinfo@gmail.com](mailto:equineinspiredinfo@gmail.com), for any questions and please watch: YouTube video link: [https://www.youtube.com/edit?o=U&video\\_id=Hfg5KmA66xk](https://www.youtube.com/edit?o=U&video_id=Hfg5KmA66xk)

Please leave your name, Email address, phone number, and where you are located.

We can also work with a qualified saddle-fitter, if you need help with the measuring process. We will even provide equipment, at no cost, required to adjust our saddles plus written instructions to become the best saddle-fitter in your country.
